

Positioning Universal Opens New Office to Accommodate Growth of Development Team

Recent expansion in the development capabilities for the Internet of Things (“IoT”) device business has led Positioning Universal to expand, moving its operations into a new facility.

SAN DIEGO ([PRWEB](#)) June 10, 2018 -- Positioning Universal is expanding! Recent growth in our R&D team has led Positioning Universal to expand and move its operations to a new facility. While existing facilities will be retained as the Engineering Design Center for the company, this expansion allows for increased customer service, manufacturing, and fulfillment operations capabilities.

The company continues to have an offering that keeps pace with the leading edge of technology and keeps users abreast of the latest developments of wireless service providers. Says Mark Wells, Positioning Universal’s President & CEO, “Expanding our development capability is crucial. Our customers are demanding this new technology, and this expansion into our new fulfillment facilities will also help us to achieve the most accurate and on-time commercial fulfillment.”

Positioning Universal’s new location in the Mission Valley area of San Diego, California, is optimal for business as it is both close to major shipping hubs and convenient for employees.
